Total: 128,233

Avg boardings: 64,117

= notable downward movement
= notable upward movement

Total does not match system ridership figures reported by Finance, due to figures above not including special trains for events and miscellaneous ridership not attributed to a specific station. However, special event riders on regular trains are included in ridership averages. Includes secondary effects of normal holidays and school vacations.

Covers period of Automatic Passenger Counts from January 1, 2009 through May 2, 2009.
