

TRAVEL TO PARK-N-RIDES

In 2018, the majority of users drove less than ten miles to access a Park-n-Ride. Of trips less than ten miles, the **average distance driven was 4.2 miles**. About 20% of the trips were less than 2 miles and could potentially have been walked or biked.

Source: RTD License Plate Survey

Note: Origins are derived from geocoded addresses associated with license plates. Origins further than ten miles from destinations have large margins of error and are not reported in this metric.
