

# RTD ANNUAL EMISSIONS

Xcel Energy plans to offer 100% carbon-free electricity by 2050 and to reduce carbon emissions 80% by 2030

In 2019, RTD vehicles and facilities produced about 185,000 tons of CO2 emissions. Most of RTD's CO2 emissions (59%) are directly emitted from diesel and gasoline vehicle tailpipes, while the rest (41%) are indirect emissions from electricity generation.
