

## Board Redistricting Questionnaire District A

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population while, those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District A includes the following jurisdictions:

- Arapahoe County
- Denver
- Glendale

The District A 2020 population is 207,418, meaning that it will have to lose approximately 2,360 to achieve the District-wide average of 205,060, and correspondingly, District A will need to contract geographically to lose that population. One of the four Districts (District B) bordering your District also must contract, while the other two (Districts C, D and E) must expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas of your District you believe would be appropriate to be kept in District A?
3. Conversely, are there areas of your District that you believe would be appropriate to be included in an adjacent Director District?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District B

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population while, those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District B includes the following jurisdictions:

- Adams County
- Aurora
- Denver

The District B 2020 population is 227,781, meaning that it will have to lose approximately 22,720 to achieve the District-wide average of 205,060, and correspondingly, District B will need to contract geographically to lose that population. Three of the five Districts (Districts A, F and K) bordering your District also must contract, while the other two (Districts C and E) must expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas of your District believe would be appropriate to be kept in District B?
3. Conversely, are there areas of your District that you believe would be appropriate to be included in an adjacent Director District?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

## Board Redistricting Questionnaire District C

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District C includes the following jurisdictions:

- Jefferson County
- Denver
- Edgewater
- Wheat Ridge

The District C 2020 population is 193,054, meaning that it will have to gain approximately 12,010 to achieve the District-wide average of 205,060, and correspondingly, District C will need to expand geographically to gain population. Of the six Districts that border your District, three (Districts A, B and K) to the north and east, must contract geographically. The Districts to the south and west (Districts D, M and L) must expand in size.

With that in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District C?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District C?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District D

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District D includes the following jurisdictions:

- Arapahoe County
- Jefferson County
- Denver
- Englewood
- Lakewood
- Littleton
- Sheridan

The District D 2020 population is 184,380, meaning that it will have to gain approximately 20,680 to achieve the District-wide average of 205,060, and correspondingly, District D will need to expand geographically to gain population. Of the six Districts that border your District, all but District A also must expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District D?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District D?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?

5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District E

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District E includes the following jurisdictions:

- Arapahoe County
- Aurora
- Denver
- Centennial
- Greenwood Village

The District E 2020 population is 196,902, meaning that it will have to gain approximately 8,160 to achieve the District-wide average of 205,060, and correspondingly, District E will need to expand geographically to gain population. Of the six Districts that border your District, four Districts (A, B, F and G) must contract geographically. The other two (Districts D and H) must expand in size.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District E?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District E?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement

should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

## Board Redistricting Questionnaire District F

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population while, those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District F includes the following jurisdictions:

- Arapahoe County
- Aurora

The District F 2020 population is 211,877, meaning that it will have to lose approximately 6,820 to achieve the District-wide average of 205,060, and correspondingly, District F will need to contract geographically to lose that population. All the Director Districts bordering your District must also contract, except for District E, to the immediate west.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas of your District believe would be appropriate to be kept in District F?
3. Conversely, are there areas of your District that you believe would be appropriate to be included in an adjacent Director District?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District G

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population while, those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District G includes the following jurisdictions:

- Arapahoe County
- Douglas County
- Aurora
- Centennial
- Foxfield
- Greenwood Village
- Lone Tree
- Parker

The District G 2020 population is 222,152, meaning that it will have to lose approximately 17,090 to achieve the District-wide average of 205,060, and correspondingly, District G will need to contract geographically to lose that population. Two of the three Districts (Districts E and H) bordering your District must expand, while the other one (District F) must contract geographically.

With that in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas of your District believe would be appropriate to be kept in District G?
3. Conversely, are there areas of your District that you believe would be appropriate to be included in an adjacent Director District?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?

5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

## Board Redistricting Questionnaire District H

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District H includes the following jurisdictions:

- Arapahoe County
- Douglas County
- Centennial
- Cherry Hills Village
- Columbine Valley
- Greenwood Village
- Littleton

The District H 2020 population is 193,323, meaning that it will have to gain approximately 11,740 to achieve the District-wide average of 205,060, and correspondingly, District H will need to expand geographically to gain population. Of the four Districts that border your District, three (Districts D, E and N) also must expand geographically. Only District G, to the east, must contract in size.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District H?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District H?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?

5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

## Board Redistricting Questionnaire District I

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population while, those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District I includes the following jurisdictions:

- Adams County
- Weld County
- Broomfield
- Erie
- Lafayette
- Thornton

The District I 2020 population is 235,658, meaning that it will have to lose approximately 30,600 to achieve the District-wide average of 205,060, and correspondingly, District I will need to contract geographically to lose that population. Two of the four Districts bordering your District (Districts J and K) also must contract, while the other two (Districts L and O) must expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas of your District believe would be appropriate to be kept in District I?
3. Conversely, are there areas of your District that you believe would be appropriate to be included in an adjacent Director District?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement

should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

## Board Redistricting Questionnaire District J

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population while, those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District J includes the following jurisdictions:

- Adams County
- Jefferson County
- Arvada
- Federal Heights
- Northglenn
- Thornton
- Westminster

The District J 2020 population is 205,900, meaning that it will have to lose approximately 840 to achieve the District-wide average of 205,060, and correspondingly, District J will need to contract geographically to lose that population. Two of the three Districts bordering your District (Districts I and K) also must contract, while the other one (District L) must expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas of your District believe would be appropriate to be kept in District J?
3. Conversely, are there areas of your District that you believe would be appropriate to be included in an adjacent Director District?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement

should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District K

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population while, those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District K includes the following jurisdictions:

- Adams County
- Weld County
- Brighton
- Commerce City
- Thornton

The District K 2020 population is 222,757, meaning that it will have to lose approximately 17,700 to achieve the District-wide average of 205,060, and correspondingly, District K will need to contract geographically to lose that population. Three of the five Districts (Districts B, I and J) bordering your District also must contract, while the other two (Districts C and L) must expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas of your District believe would be appropriate to be kept in District K?
3. Conversely, are there areas of your District that you believe would be appropriate to be included in an adjacent Director District?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District L

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District L includes the following jurisdictions:

- Adams County
- Jefferson County
- Arvada
- Westminster

The District L 2020 population is 198,295, meaning that it will have to gain approximately 6,765 to achieve the District-wide average of 205,060, and correspondingly, District L will need to expand geographically to gain population. Of the seven Districts that border District L, four of those (Districts C, M, N and O) also will need to expand geographically. The three Districts to the northeast (I, J and K) must contract geographically.

1. Director Preferences Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District L?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District L?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement

should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District M

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District M includes the following jurisdictions:

- Jefferson County
- Golden
- Lakeside
- Lakewood
- Mountain View
- Wheat Ridge

The District M 2020 population is 192,317 181,149, meaning that it will have to gain approximately 12,743 to achieve the District-wide average of 205,060, and correspondingly, District M will need to expand geographically to gain population. The challenges associated with that expansion are that all four Districts that border District M also need to gain population and expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District M?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District M?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement

should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

Write Your Responses in Here:

## Board Redistricting Questionnaire District N

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District N includes the following jurisdictions:

- Unincorporated Jefferson County
- Lakewood
- Littleton
- Morrison

The District N 2020 population is 181,149, meaning that it will have to gain approximately 34,320 to achieve the District-wide average of 205,060, and correspondingly, District N will need to expand geographically to gain population. The challenges associated with that expansion are that District N abuts the west side of the RTD boundary, and all five of the Director Districts bordering your Director District must also expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District N?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District N?
4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?

## Board Redistricting Questionnaire District O

As we are initiating the Redistricting process, we want to survey each Board member to learn more about the considerations that are important to you as we begin drafting the new Director District map.

In the period between 2010 and 2020, the District's population grew by 408,208 people for a total population of 3,075,920. On average, after the redistricting process, each of the Director Districts will have a population of approximately 205,060. As expected, the population growth was not evenly distributed throughout RTD. In general terms, the Director Districts in the east grew the most, while those on the west grew less. Accordingly, those Director Districts that experienced the most growth will have to be reduced in geographic size and lose population, while those that experienced the least growth will have to expand in size to gain population.

To the extent possible, the Redistricting Committee has historically relied on the following guidelines:

- Districts comprised of whole voter precincts
- Current Directors to be kept in their existing Districts
- 5% deviation between most and least populous districts
- Follow jurisdictional lines when possible
- Avoid irregular boundary lines

District O includes the following jurisdictions:

- Boulder County
- Boulder
- Jamestown
- Longmont
- Louisville
- Lyons
- Nederland
- Superior
- Ward

The District O 2020 population is 203,656, meaning that it will have to gain approximately 1,400 to achieve the District-wide average of 205,060, and correspondingly, District O will need to expand geographically to gain population. The challenges associated with that expansion are that District O abuts the west side of the RTD boundary, and two of the three Director Districts (Districts L and N) bordering your Director District must also expand geographically.

With that challenge in mind,

1. Within your District, are there communities of interest that you would like to keep intact?
2. Are there any areas in the adjacent Director Districts that you believe would be appropriate to be included into District O?
3. Conversely, are there areas in the adjacent Director Districts that you believe would not be appropriate to be included into District O?

4. Overall, from a District-wide perspective, are there any overarching goals you would like to see with the redistricting effort?
5. The existing Guidelines state that current Directors are to be kept in their existing Districts. At the Ad Hoc Redistricting Committee meeting, Directors questioned whether that requirement should be kept. Do you support maintaining that requirement? Or, do you think it should be dropped?
